

THE YALE UNIVERSITY SCHOOL OF MEDICINE, SECTION OF NEPHROLOGY is seeking faculty applicants at the assistant or early associate professor level to pursue independent research programs in basic research or translational medicine pertinent to all areas of kidney biology or disease in the context of our exceptionally strong and supportive research environment. Research interest in basic biology of kidney disease related processes or in translational clinical science and genetic epidemiology are welcome. Laboratory space, startup funds and significant protected time commensurate with needs are available. Successful applicants should be clinically trained to practice nephrology and demonstrated success in competing for extramural funding is desirable.

Review of applications will begin on September 1, 2016 and will continue until the position(s) are filled. Please reply with CV, a description of the research program and names of three references to:

Stefan Somlo, M.D.
Chief, Section of Nephrology
Yale University School of Medicine
